Small companies come out with a crappy product and blame M\$ cause they can't compete. BooHoo. While I think M\$\$ may have been wrong in some respects I think the law suit is way out of line. I will use nothing but M\$ products from now on where ever possible as a protest to this attrocity(not that I dont now but now I will double my efforts) and netscape please die now and leave us alone. heres another little bit. The only way that aol is #1 is because they flood the public with its bull. I tried it and hated it. Not my fault or M\$ fault if they bought a loser like netscape.
